

PRO-NET Partners with Leading CPOs to Expand EV Charging Access in Condominiums Nationwide

Proton e.MAS and smart Owners Now Enjoy Convenient Charging at 320 Condominiums Nationwide

Subang Jaya, 7 May 2025 – PRO-NET, the new energy subsidiary of PROTON, has officially joined forces with four of the region’s top Charging Point Operators (CPO) Charge+, ChargeSini, RExharge, and Charge N Go – to enhance electric vehicle (EV) charging accessibility at residential condominiums across Malaysia. The collaboration aims to further strengthen the national EV ecosystem and support the increasing number of Proton e.MAS and smart owners.

“Our collaboration with these CPOs supports our goal of making EV ownership simpler and more accessible,” said Mr Zhang Qiang, Chief Executive Officer of PRO-NET. “We’re especially focused on helping high-rise residents who often face challenges when it comes to home charging. This partnership not only brings convenient, reliable, and affordable charging closer to them, but also makes it easier for residents and building management to get the support they need to set up EV chargers. It’s a big step toward helping more people make the switch to electric with confidence.”

With this partnership, Proton e.MAS and smart customers can now conveniently charge their vehicles at 320 condominium and apartment locations nationwide. Including the earlier collaboration with EV Connection (EVC) in December 2024, PRO-NET now lists a total of 1,053 charging points at high-rise residential buildings across the country. Together, these initiatives contribute to Malaysia’s 90% coverage milestone for public charging needs, complementing to the current network of 2,500 public charging points nationwide.

Strategic Partnership to Boost Charging Access for High-Rise Residents

The signing ceremony, held today at PROTON’s Centre of Excellence in Subang Jaya, marks another important step in Malaysia’s journey toward a greener future. Through this collaboration, PRO-NET aims to make EV ownership easier and more affordable by working directly with four CPOs to install chargers at residential condominiums and apartments.

Each CPO brings unique strengths to the collaboration. Charge+ is Singapore’s largest EV charging operator. The company is installing chargers at 18 condominium locations in Malaysia as part of its regional expansion. A specialist in residential and workplace charging, Charge N Go is installing chargers at 93 condominium locations to bring EV charging closer to everyday living. As the largest local CPO by coverage with more than 1,010 charging points nationwide, ChargeSini is expanding its charger installation at 204 condominium locations. RExharge, a trusted clean energy solutions provider, supports the partnership with charging solutions backed by more than 1,000 residential projects and more than 100 EV chargers and will be installing chargers at five (5) condominium locations.

More importantly, it brings real cost savings to customers. By enabling Proton e.MAS and smart owners to charge at home with lower rates than typical public chargers, this partnership helps reduce the overall cost of owning an EV—while making charging more convenient for high-rise residents.

Exclusive Promotion for e.MAS and smart Owners, Special Rates Across CPO Networks

To mark the launch of this strategic collaboration, PRO-NET is rolling out a limited-time promotional campaign exclusively for Proton e.MAS dan Hello smart app users. Beginning 1 June 2025 until 31 December 2025, owners will enjoy special EV charging rates at participating condominium charging points provided by each CPO. Each partner will offer customised promotional pricing, with rates starting from RM0.75/kWh, depending on location and provider:

CPO Partner	AC Charging Rate From	DC Charging Rate From
Charge+	RM0.75/kWh	-
ChargeSini	RM0.84/kWh	RM1.11/kWh
RExcharge	RM0.75/kWh	RM0.99/kWh
Charge N Go	RM0.75/kWh	-

These rates will be available exclusively via the Proton e.MAS App, which seamlessly integrates PRO-NET's live charging map with each CPO's charging platform. EV users can expect monthly savings of up to RM150 to RM200, especially compared to public charging.
